

# Three steps to take in case of a chemical emergency

## 1. SHELTER

Go indoors immediately. Take family and pets with you.

Avoid phone use. Emergency Services may need to contact you.

## 2. SHUT

Close all external doors and windows. Seal gaps with blankets, towels or duct tape.

Turn off heaters, air conditioners and exhaust fans. Close fireplace dampers.

## 3. LISTEN

Listen to local ABC or any commercial radio station, turn on the television for media messages.

Wait for "all clear" message, then open doors and windows to ventilate building. Go outside.

**Implement the 3 steps immediately if you can smell chlorine**
